LANGUAGE LEARNING

Blended Learning is an innovative approach to teaching foreign languages that meets the requirements of the modern way of life. This concept successfully overcomes some of the key difficulties in effectively acquiring English as the language of international communication.

PROJECT TEAM

Digital transformation, changes in communication and learning styles, improved flexibility and easy access, inclusive dimension and alignment with the Common European Framework for Languages are some of the elements of the I-BLU that would not have been possible without the joint international efforts of five partners: Babel Idiomas from Spain, Blackbird from Serbia, CPIP from Romania, Jantar from Croatia and LUV from Slovenia.

THE PROJECT

I-BLU - Innovative Blended Language Upskilling is an innovative English course for adults who improve their language competences.

The course is based on extensive research of adult learner types and contains multiple modules for different learning needs and styles.

A special part of the program contains methodical support and materials intended for teachers, lecturers and training organizers.

The innovative “blended” format provides maximum flexibility and optimum engagement as the basis for rapid and safe progress towards independent and functional use of English in everyday and business communication.

The project implementation period is October 2022 – October 2024. The platform is scheduled to start in October 2024. Access to and use of the I-BLU Innovative Language Upskilling training course is free of charge.

TARGET GROUP

I-BLU is intended for young people and adults who learn and improve English for employment and everyday communication at work, study and leisure.

For educators, teachers, schools and employers, I-BLU opens the possibility of systematically using the platform for organized teaching and training of a larger number of participants.
